

FASSON[®]

SHEET STOCK SERVICE

With most projects, success can ultimately depend on the ability to react. Thanks to our Stock Service, having small quantities of self-adhesive materials immediately available represents a key competitive advantage in terms of maximizing business opportunities and new projects.

Fast delivery

We know how important deadlines are to you. By taking advantage of our extensive distribution network, you will receive your order quickly.

Stock Management

We provide you with the highest quality materials, papers and films that can be printed using both Offset and Digital technology (liquid or dry toner). In addition, you will have access to a wide array of self-adhesive options in small quantities. As a result, you will be able to streamline your stock by reducing high inventory levels and product losses.

Flexibility

You gain flexibility in adapting to the constant changes in the market. This will allow you to offer new projects that cover small productions in a more customized way.

Sustainability

All the FSC® C011032 certified products and papers we have in stock, including facestock and base paper, are sold as FSC® Mix Credit. At Lecta, we have PEFC™ and FSC® Chain-of-Custody certifications. All of our wood and cellulose purchases are certified or controlled by these certifications.

Safety

In papers sold within the European Union, Lecta does not use any of the substances included in the latest update of the SVHC list of the REACH Regulation. In addition, all Fasson® products are in compliance with:

- Directive 94/62/EC on packaging & packaging waste.
- Directive 2002/95/EC on the restriction of the use of certain hazardous substances in electrical and electronic equipment (RoHS).
- Standard EN 71-3 on toy safety and Regulation (EC) 1935/2004 on materials and articles intended to come into contact with food.
